

# Labs for a Greener Tomorrow

## About Us

Sustainability is an urgent necessity for safeguarding our planet for future generations. Laboratories contribute significantly to this effort by adopting practices that minimize their environmental impact and by developing solutions that help industries transition to more sustainable operations. Their role includes conducting environmental testing, certifying sustainable products, and supporting the implementation of green technologies.

This event aims to bring together stakeholders from the laboratory sector to discuss the importance of sustainability, share best practices, and explore collaborative strategies for a more sustainable future. Through informative sessions and expert insights, participants will be equipped with the knowledge and tools to drive sustainability initiatives within their laboratories and contribute to the broader goal of climate resilience.

## Target Audience

- Industry Professionals
- Policymakers
- Academics and Researchers
- NGOs and Environmental Organizations
- Students and Young Professionals

## Innovating for Sustainability & Climate Action

26 November 2024

CII-IQ, Magadi Road, Bangalore

## Sessions in Focus

**The Climate Imperative: Harnessing Laboratory Power for Sustainable Solutions**

**Sustainable Laboratory Practices**

**Conformity Assessment and Accountability: Upholding Environmental Standards for Global Sustainability**

**Empowering Sustainability: The Role of BIS in Developing Effective Environmental Standards**

**Waste Not: Strategies for Minimizing Laboratory Waste**

**Charting the Path Forward: The Future of Sustainable Laboratories**
